ARTICULATING LAPAROSCOPIC RETRACTORS AND BAND-PASSER

Used in the peritoneal space to retract organs and structures, these unique advanced instruments feature a slim 5mm shaft to make it easy to use with any 5.0 or 5.5mm trocar sleeve. A Luer Lock flushing port allows a thorough cleaning.

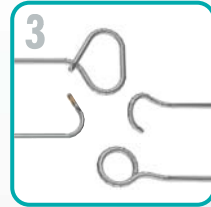

All retractors are an advancement of the previous model and provide the following advantages:

1 More comfortable carbon handle

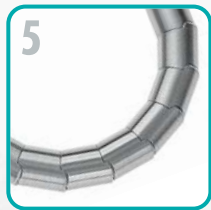

2 Faster opening and closing

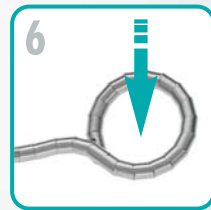

3 Larger model variety

4 Overload protection

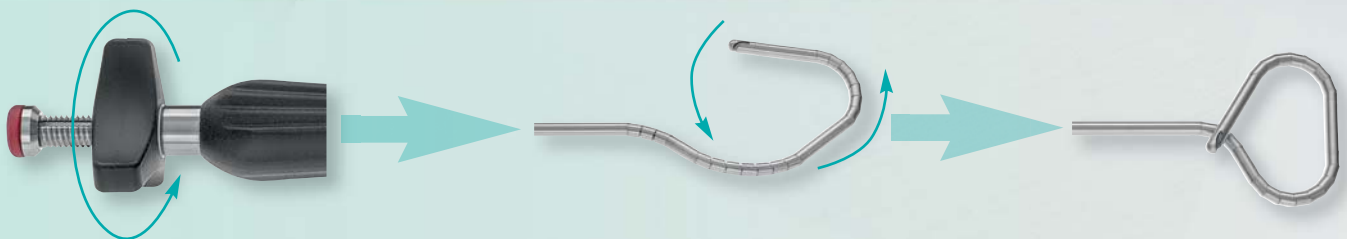

5 Atraumatic segments, jamming is prevented

6 High loading capacity and stability

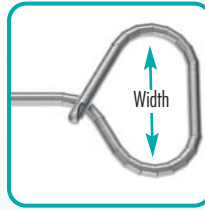

7 The nitinol wire straightens the working end to allow easy introduction and extraction

5mm shaft, 340 or 450mm working length

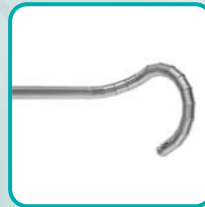

Luer-Lock flushing port

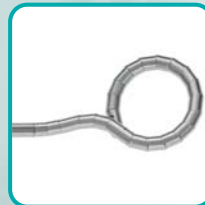

TRIANGULAR

Orientation	Width	Length	Order Number
Straight	60mm	330mm	300-069-000
	60mm	450mm	300-069-450
	80mm	330mm	300-070-000
	80mm	450mm	300-070-450
30° angled	60mm	330mm	300-072-000
	60mm	450mm	300-072-450
	80mm	330mm	300-073-000
	80mm	450mm	300-073-450

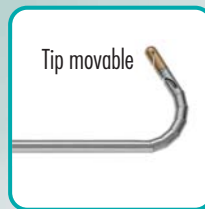

HOOK

Orientation	Shape	Length	Order Number
90° upwards	Curved right	340mm	300-075-001
	Curved left	340mm	300-075-002
Angled 45°	Curved right	340mm	300-075-101
	Curved left	340mm	300-075-102

CIRCLE

Orientation	Width	Length	Order Number
Straight	40mm	340mm	300-076-001
Angled	40mm	340mm	300-076-101

BAND-PASSER

Orientation	Length	Order Number
Straight	330mm	300-071-000
Straight	450mm	300-071-450

J-RETRACTOR

Orientation	Length	Order Number
Straight	340mm	300-077-000
