ENDOSCOPIC PNEUMATIC SYSTEM "ENDOBTULER"

The RZ EndoButler provides the OR-Team with an easy to install and easy to use pneumatic endoscope and instrument holding system.

Due to the stepless positioning, the image is not blurred in any way. The EndoButler works like a third arm of the surgeon to assist in any position in the OR-field.

Without turning, loosening and mooring at any spin it can perform a position change very easily and fast, like an assistance. It can be connected with the central gas supply or with a local gas bottle.

ENDO BUTLER

Scan the QR Code to view the
ENDOBTULER Setup video.
Or simply visit our RZ Medizintechnik
YouTube Channel.

Advantages:

- rapid position changing
- wide range of movements
- smooth moving without blurring
- light version due to the use of titanium and technical polymer parts
- easy cleaning and sterilizing
- access to all positions in the operating field
- perfect fitting for the 3D technology
