L 100 LITHOTRIPTOR

news
01.2017

L 100 LITHOTRIPTOR

- Energy transmission occur purely mechanically resulting an high efficient stone fragmentation
- The smallest probe diameter is only 0.6mm, which ensures a larger lumen for efficient irrigation.
Auxiliary instruments can also be inserted
- The handling of the RZ URO LITH is very simple and all parts are easy to disassemble for cleaning purposes
- Our system is compatible to other RZ and other instruments for the therapy of ureteric, renal and bladder stones
- The hand piece as well as the intracorporel probe are non conductive elements which ensure the safety for patients as well as users against current conduct
